

Testing for Pesticide Residues

To meet the expectations of consumers, supermarkets and regulations farmers employ a range of pest control measures to ensure that produce is plentiful and free of blemishes, insects and mould. With hundreds of pesticides available and the increasingly stringent controls and regulations, it is essential that comprehensive pesticide residue testing is carried out to ensure the safety of our food.

Targeted detection

From our site in Wolverhampton, Eurofins can offer a range of pesticide residue detection services including:

- ✓ Extensive multi residue determinations
- ✓ Comprehensive list of single analyte targeted methods
- ✓ Analytes from Pesticide Safety Directorate surveillance programme
- ✓ Compounds commonly found in products imported from outside the EU

The service includes:

- ✓ Individual reporting of multi residue actives against EC Regulation 396/2005, to a reporting level of 0.01 mg/kg
- ✓ UKAS accredited tests
- ✓ Preparation of sampling plans and risk assessments
- ✓ Specialist support from Eurofins pesticide centres in Sweden and Germany

Fast reliable service

Eurofins has an unrivalled track record in the consistent delivery of accurate results to an agreed turnaround time.

To meet the demand for rapid results needed for positive release of product, we can now offer a same-day and next-day reporting service across the whole of the UK. In addition, are options for 3-day, 5-day or 10-day reporting to support due diligence programmes.
